HELI YUFENG INTELLIGENT LOGISTICS SYSTEM

Heli Yufeng: Navigating the New Era of Intelligent Logistics

Anhui Heli Yufeng Intelligent Technology Co., Ltd. (abbreviated as “Heli Yufeng”) is a controlled subsidiary of Anhui Heli Co., Ltd. (Stock Code: 600761). Headquartered in Hefei, China, the company has been recognized as a National High-Tech Enterprise and National-Level Innovative “Little Giant” Enterprise.

Heli Yufeng provides intelligent logistics system solutions for factories and industrial parks. The company has established a product matrix comprising “Intelligent Logistics Storage Robots + Intelligent Mobile Robots,” while independently developing products such as “Intelligent Integration Systems + Digital Twin Platforms.” In collaboration with Heli’s global network of over 1,000 marketing and service institutions, Heli Yufeng offers comprehensive full-stack intelligent logistics solutions throughout the entire project lifecycle. The company has established benchmark demonstration projects across multiple industries, for example new energy, chemical and fertilizer, beverages, food and cold chain, automotive, tires, etc.

5+
5 Major machine manufacturing bases

1000+
1000+ sales and service networks

60+
60+ Years of focus on logistics services

HELI YUFENG
Empower The World
Make Logistics More Free

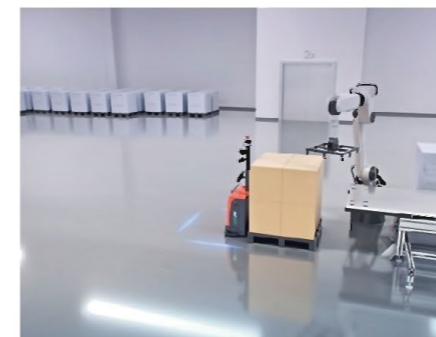

INTELLIGENT LOGISTICS SOLUTIONS FOR ALL SCENARIOS

HELI delivers comprehensive intelligent logistics solutions for industrial parks—covering production line, warehousing, and cross-area transportation—to build an efficient, flexible, and seamlessly integrated system that accelerates automation progress for our users.

PRODUCTION LINE LOGISTICS

Flexible Distribution with Real-time Response to Production Tasks

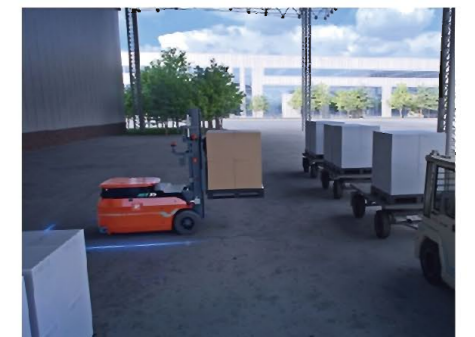

WAREHOUSING AND LOGISTICS

Integrated Intelligent Storage for Multifunctional Warehouses

CROSS-AREA TRANSPORTATION

Outdoor/Semi-outdoor Transportation Across Plant Areas for Complex and Dynamic Scenarios

HANDLING AGV 01

Specialized Handling AGV

CBD15-AGV1A1Li CBD20-AGV1A1Li

It is mainly used for point-to-point transfer of materials between ground-level flat warehouses, production lines, and different processes within production lines, and can be customized

Key Features

- Equipped with an NDC control system, it ensures stable and reliable vehicle control and system scheduling.
- Adopting laser navigation, it boasts high positioning accuracy.
- With a compactly designed body, it enables flexible operation.
- Equipped with obstacle avoidance lasers + fork tip sensors + contour algorithm protection + anti-collision edges + acousto-optic early warning, it achieves comprehensive safety protection.
- Adopting servo-integrated electric steering, it offers fast response and precise control.
- Adopting a pressure-boosted floating design for the driving wheels, it ensures reliable ground contact and high stability.

Technical Parameters

Product Model	Unit	CBD15-AGV1A1Li	CBD20-AGV1A1Li

Navigation	/	Laser Guided (Reflective)	Laser Guided (Reflective)
Rated Load	kg	1500	2000
Max. Lift Height	mm	120	120
Max. Speed (Loaded/Unloaded)	km/h	5/5	5/5
Min. Turning Radius	mm	1453	1453
Aisle Width for Right-angle Stacking (1000x1200 pallet)	mm	2208	2208
Position Deviation Accuracy	mm	±5	±5
Communication Method	/	5G/wifi	5G/wifi
Std. Battery Capacity	V/Ah	48/40	48/40
Weight (incl. battery)	kg	450	450
Standard Dimensions (L x W x H)	mm	1644x932x1887	1644x932x1887

Note: Products can be customized to meet specific application requirements. The above parameters are for reference only. Exact specifications are subject to actual consultation

Specialized Handling AGV

CBD15-AGV1A1Li CBD15-AGV6B5Li

It is mainly used for point-to-point horizontal handling, capable of meeting the needs of medium and short-distance handling in supermarkets, workshops, and warehouses. It can also be custom-designed according to specific handling requirements.

Key Features

- Adopting a horizontal drive with integrated electric steering, it achieves higher steering control precision;
- Equipped with a mechanical operating handle, it allows flexible switching between manual and automatic modes;
- Featuring a dual servo control system, it boasts short system response time and excellent motor follow-up performance;
- Equipped with visual, laser, infrared, and ultrasonic obstacle avoidance, it provides all-round safety protection;
- With a split-type housing design, it enables quick battery replacement.

Technical Parameters

Product Mode	Unit	CBD15-AGV6A5Li	CBD15-AGV6B5Li
Type	/	Handling	Handling
Navigation	/	2D/3D slam	2D/3D slam

Specialized Handling AGV

CBD30-AGV6A5Li

It is commonly used for point-to-point transfer of materials between ground-level flat warehouses, production lines, and different processes within production lines, and can be customized.

Key Features

- Designed as a specialized model, it features a compact body and flexible operation.
- Equipped with obstacle avoidance lasers + fork tip sensors + contour algorithm protection + anti-collision edges + acousto-optic early warning, it creates comprehensive safety protection.
- Fitted with end recognition cameras + pallet in-place switches, it enables precise goods picking.
- Adopting servo-integrated electric steering, it boasts fast response and precise control.
- With a pressure-boosted floating design for the driving wheels, it ensures reliable ground contact and high stability.

Technical Parameters

Product Mode	Unit	CBD30-AGV6A5Li
Type	/	Handling
Navigation	/	2D/3Dslam
Rated Load	kg	3000
Max. Lift Height	mm	120
Max. Speed (Loaded/Unloaded)	km/h	5/5
Min. Turning Radius	mm	1482
Aisle Width for Right-angle Stacking (1000x1200 pallet)	mm	2235
Position Deviation Accuracy	mm	±10
Communication Method	/	5G/wifi
Std. Battery Capacity	V/Ah	48/100
Weight (incl. battery)	kg	750
Standard Dimensions (L x W x H)	mm	1668x855x1917

Note: Products can be customized to meet specific application requirements. The above parameters are for reference only. Exact specifications are subject to actual consultation

Specialized Handling AGV

EBA20II

It is mainly used for point-to-point horizontal handling, capable of meeting the needs of medium and short-distance handling in supermarkets, workshops, and warehouses, and can be customized.

Key Features

- Featuring a thin-arm design and a small turning radius, it easily adapts to narrow aisles and confined spaces;
- Equipped with a floating drive system that automatically adjusts traction force under varying loads, the AGV robot can steadily and smoothly navigate ramps and floor gaps;
- Standard configurations include a pallet recognition camera and a pallet positioning pressure plate, enabling precise picking and placing of multi-format pallets, racks, and material cages.

Technical Parameters

Product Mode	Unit	EBA20II
Type	/	Handling
Navigation	/	2D/3Dslam
Rated Load	kg	2000
Max. Lift Height	mm	205
Max. Speed (Loaded/Unloaded)	km/h	3.6/5.4
Min. Turning Radius	mm	1335
Aisle Width for Right-angle Stacking (1000x1200 pallet)	mm	1918+300
Position Deviation Accuracy	mm	±10
Communication Method	/	5G/wifi
Std. Battery Capacity	V/Ah	48/60
Weight (incl. battery)	kg	600
Standard Dimensions (L x W x H)	mm	1650x990x1927

Note: Products can be customized to meet specific application requirements. The above parameters are for reference only. Exact specifications are subject to actual consultation

STRADDLE-TYPE AGV 02

Specialized Straddle-type AGV

CTD40-AGV11BLi CTD60-AGV1A1Li

It is mainly used indoors, with an operating lifting height of less than 5 meters, for handling and stacking scenarios of heavy-load materials.

Key Features

- High-precision laser navigation technology, with a positioning accuracy of up to $\pm 5\text{mm}$;
- Compact body, small turning radius and excellent stability;
- Strong load-bearing capacity and a wide range of applications; High-strength mast with strong load-bearing capacity at high positions;
- Modular design, supporting optional legs of various widths.

Technical Parameters

Product Model	Unit	CTD40-AGV11BLi	CTD60-AGV1A1Li
Type	/	Straddle	Straddle
Navigation	/	Laser Guided (Reflective)	Laser Guided (Reflective)
Rated Load	kg	4000	6000
Max. Lift Height	mm	5000	5000
Max. Speed (Loaded/Unloaded)	km/h	6/7	6/7
Min. Turning Radius	mm	1770	2124
Aisle Width for Right-angle Stacking (1000x1200 pallet)	mm	2845	3250
Position Deviation Accuracy	mm	± 5	± 5
Communication Method	/	5G/wifi	5G/wifi
Std. Battery Capacity	V/Ah	48/404	80/300
Weight (incl. battery)	kg	3400	4650
Standard Dimensions (L x W x H)	mm	2313x1646x2434	2644x1753x2270

Specialized Straddle-type AGV

CDD20KJ

It is commonly used in scenarios such as pallet handling, production line docking, and line-side warehouse storage. It can be applied to carriers like square grid pallets and European standard pallets, and is suitable for industries such as new energy, automotive parts, 3C electronics, and retail, among others.

Key Features

- Adopting a thin arm design with a small turning radius, it easily adapts to narrow passages and confined spaces;
- Equipped with a floating drive system that automatically adjusts traction force under varying loads, the AGV robot can steadily and smoothly navigate ramps and floor gaps;
- Standard configurations include a pallet recognition camera and a pallet positioning pressure plate, enabling precise picking and placing of multi-format pallets, racks, and material cages;
- Features 360° obstacle avoidance laser safety protection;
- Supports customization to meet the needs of different carriers.

Technical Parameters

Product Model	Unit	CDD20KJ
Type	/	Narrow Aisle Stacker
Navigation	/	2D/3Dslam
Rated Load	kg	2000
Max. Lift Height	mm	3300
Max. Speed (Loaded/Unloaded)	km/h	3.6/5.4
Min. Turning Radius	mm	1300
Aisle Width for Right-angle Stacking (1000x1200 pallet)	mm	1970+300
Position Deviation Accuracy	mm	± 10
Communication Method	/	5G/wifi
Std. Battery Capacity	V/Ah	24/200
Weight (incl. battery)	kg	1010
Standard Dimensions (L x W x H)	mm	1960x1318x2110

Specialized Straddle-type AGV

CDD50KJ CDD80KJ

It is commonly used in handling scenarios such as non-standard pallets, finished products on production lines, and equipment, and is applicable to industries like engineering machinery, automotive parts, etc.

Key Features

- Adopting a high-strength frame design, the drive assembly is suitable for heavy-duty operations;
- Equipped with a Curtis controller + servo controller, it is more stable, safer and more precise;
- Reserved with abundant attachment interfaces, it meets various handling scenarios under special operating conditions;
- Equipped with lifting pump control and lowering proportional valve, it achieves precise control of lifting and lowering;
- Standard-equipped with a pallet recognition camera + pallet in-place pressing plate, it enables pick-and-place operations for various types of pallets, racks, and material cages, as well as precise goods picking.

Technical Parameters

Product Model	Unit	CDD50KJ	CDD80KJ
Type	/	Wide Stance Stacker	Wide Stance Stacker
Navigation	/	2D/3Dslam	2D/3Dslam
Rated Load	kg	6000	8000
Max. Lift Height	mm	3000	3000
Max. Speed (Loaded/Unloaded)	km/h	3.6/5.4	3.6/5.4
Min. Turning Radius	mm	1995	2095
Aisle Width for Right-angle Stacking (1000x1200 pallet)	mm	2850+300	3000+300
Position Deviation Accuracy	mm	±10	±10
Communication Method	/	5G/wifi	5G/wifi
Std. Battery Capacity	V/Ah	48/300	80/300
Weight (incl. battery)	kg	3500	3800
Standard Dimensions (L x W x H)	mm	2600x1600x2700	2700x1800x3000

03 STACKING-TYPE AGV

Specialized Stacking-type AGV

CDD30L0AGV1

It is commonly used in medium and high-level stereoscopic warehousing and the automated turnover of production line materials.

Key Features

- Adopting laser navigation for precise positioning;
- Adopting servo control for more accurate operation;
- Designed with dual-mode control to meet manual driving needs;
- Equipped with multiple safety protections including laser, mechanical, emergency stop, and acousto-optic safeguards;
- Featuring a side-pull battery replacement design for easy swapping.

Technical Parameters

Product Model	Unit	CDD30L0AGV1
Type	/	Stacker
Navigation	/	2D/3Dslam
Rated Load	kg	3000
Max. Lift Height	mm	1500
Max. Speed (Loaded/Unloaded)	km/h	2.8/3.6
Min. Turning Radius	mm	1925
Aisle Width for Right-angle Stacking (1000x1200 pallet)	mm	2800
Position Deviation Accuracy	mm	±10
Communication Method	/	5G/wifi
Std. Battery Capacity	V/Ah	51.2/240
Weight (incl. battery)	kg	2150
Standard Dimensions (L x W x H)	mm	2360x1110x2455

Dual-mode Stacking-type AGV

CDD16-AGV6A5Li CDD16-AGV1D1Li

It is commonly used in scenarios such as pallet handling, production line docking, and line-side warehouse storage. It is suitable for narrow-aisle rack storage and narrow-aisle production line handling, and applicable to industries including new energy, automotive parts, 3C electronics, and retail, among others.

Key Features

- Easily adapts to narrow passages and confined spaces;
- Equipped with a floating drive system that automatically adjusts traction force under varying loads, the AGV robot can steadily and smoothly navigate ramps and floor gaps;
- Adopting a servo steering system, it achieves higher steering control precision;
- Featuring forward dual obstacle avoidance and a full-enclosed anti-collision edge design, along with optional forward top obstacle avoidance and rear bottom obstacle avoidance, it fully meets users' safety standards;
- Supports customization to meet the needs of different carriers.

Technical Parameters

Product Model	Unit	CDD16-AGV6A5Li	CDD16-AGV1D1Li
Type	/	Narrow Body & Wide Stance Stacker	Narrow Body & Wide Stance Stacker
Navigation	/	2D/3Dslam	Laser Guided (Reflective)
Rated Load	kg	1600	1600
Max. Lift Height	mm	3000	3000
Max. Speed (Loaded/Unloaded)	km/h	4/5	4/5
Min. Turning Radius	mm	1320	1320
Aisle Width for Right-angle Stacking (1000x1200 pallet)	mm	2307	2307

Weight (incl. battery)	kg	1110	1110
Standard Dimensions (L x W x H)	mm	1832x1010x2150	1832x1010x2150

Dual-mode Stacking-type AGV

EDA20II

It is commonly used in scenarios such as pallet handling, production line docking, and line-side warehouse storage. It is suitable for narrow-aisle rack storage and narrow-aisle production line handling, and applicable to industries including new energy, automotive parts, 3C electronics, and retail, among others.

Key Features

- Easily adapts to narrow passages and confined spaces;
- Equipped with a floating drive system that automatically adjusts traction force under varying loads, the AGV robot can steadily and smoothly navigate ramps and floor gaps;
- Standard configurations include a pallet recognition camera and a pallet positioning pressure plate, enabling precise picking and placing of multi-format pallets, racks, and material cages;
- Multiple safety protections, including 360° obstacle avoidance laser safety protection;
- Equipped with a 3D vertical obstacle avoidance camera to ensure safety in human-machine interaction scenarios;
- Supports customization to meet the needs of different carriers.

Technical Parameters

Product Model	Unit	EDA20II
Type	/	Narrow Body & Wide Stance Stacker
Navigation	/	2D/3Dslam
Rated Load	kg	2000
Max. Lift Height	mm	3300
Max. Speed (Loaded/Unloaded)	km/h	3.6/5.4
Min. Turning Radius	mm	1250
Aisle Width for Right-angle Stacking (1000x1200 pallet)	mm	1930+300
Position Deviation Accuracy	mm	±10
Communication Method	/	5G/wifi
Std. Battery Capacity	V/Ah	24/200
Weight (incl. battery)	kg	920
Standard Dimensions (L x W x H)	mm	1705x930x1410

Dual-mode Stacking-type AGV

EDQ10

It is suitable for narrow-aisle rack storage and narrow-aisle production line handling.

Key Features

- It features driving modes including straight movement,
- lateral movement, diagonal movement, and in-place rotation;
- It enables continuous and free switching of driving modes for more efficient handling;
- Narrow-body design, with a lateral movement aisle width of only 1.8 meters;
- Dual-drive and four-steering structure equipped with full servo motors, achieving high-precision control;
- Customizable non-standard forks are available to meet the handling needs of different types of cargo carriers.

Technical Parameters

Product Model	Unit	EDQ10
Type	/	Omni-Directional Stacker
Navigation	/	2D/3Dslam
Rated Load	kg	910
Max. Lift Height	mm	2500
Max. Speed (Loaded/Unloaded)	km/h	3.6/2.8
Min. Turning Radius	mm	1705+300
Aisle Width for Right-angle Stacking (1000x1200 pallet)	mm	1875+300
Position Deviation Accuracy	mm	±10
Communication Method	/	5G/wifi
Std. Battery Capacity	V/Ah	48/50
Weight (incl. battery)	kg	800
Standard Dimensions (L x W x H)	mm	1705X1000X1410

04 COUNTERBALANCED AGV

Dual-mode Counterbalanced AGV

CPD35L0AGV1

Counterbalanced AGVs are commonly used in automotive manufacturing, auto parts logistics, high-level rack storage, and stereoscopic warehouses.

Key Features

- Laser navigation ensures precise positioning and simple deployment;
- Servo control for higher precision;Side-pull battery replacement for convenient endurance;
- Multiple optional working devices such as pushers are available to adapt to different working scenarios;
- Multiple safety protections including laser, mechanical, emergency stop, and acousto-optic safeguards.

Technical Parameters

Product Model	Unit	CPD35L0AGV1
Type	/	Dual Mode Counterbalance
Navigation	/	2D/3Dslam
Rated Load	kg	3500
Max. Lift Height	mm	3000
Max. Speed (Loaded/Unloaded)	km/h	2.8/3.6
Min. Turning Radius	mm	2100
Aisle Width for Right-angle Stacking (1000x1200 pallet)	mm	3760
Position Deviation Accuracy	mm	±20
Communication Method	/	5G/wifi
Std. Battery Capacity	V/Ah	51.2/420
Weight (incl. battery)	kg	5100
Standard Dimensions (L x W x H)	mm	3655x1510x2360

Dual-mode Stacking-type AGV

CPD20SQ-AGV6A5Li

Applicable to transfer operations in indoor and outdoor environments of various places such as logistics and warehousing systems, automated factories, workshops, and warehouses.

Key Features

- Three-point support electric steering, featuring a small turning radius and excellent passability;
- Equipped with a ZAPI controller, it is more stable, safer and more precise;
- Manual and automatic dual driving modes;
- Enables fast battery replacement to enhance endurance.

Technical Parameters

Product Model	Unit	CPD20SQ-AGV6A5Li
Type	/	Counterbalance
Navigation	/	2D/3Dslam
Rated Load	kg	2000
Max. Lift Height	mm	5000
Max. Speed (Loaded/Unloaded)	km/h	7/7
Min. Turning Radius	mm	1741
Aisle Width for Right-angle Stacking (1000x1200 pallet)	mm	3532
Position Deviation Accuracy	mm	±10
Communication Method	/	5G/wifi
Std. Battery Capacity	V/Ah	48/404
Weight (incl. battery)	kg	3750
Standard Dimensions (L x W x H)	mm	3286x1170x2425

Dual-mode Stacking-type AGV

CPD35SQ-AGV6A5Li

Applicable to transfer operations in indoor and outdoor environments of various places including logistics and warehousing systems, automated factories, workshops, and warehouses.

Key Features

- Three-point electric steering with small turning radius and excellent passability;
- Adopting ZAPI controller for greater stability, safety and precision;
- Equipped with manual and automatic dual modes, covering a wide range of scenarios;
- Supports fast battery swapping to enhance endurance.

Technical Parameters

Product Model	Unit	CPD35SQ-AGV6A5Li
Type	/	Counterbalance
Navigation	/	2D/3Dslam
Rated Load	kg	3500
Max. Lift Height	mm	5500
Max. Speed (Loaded/Unloaded)	km/h	7/7
Min. Turning Radius	mm	2124
Aisle Width for Right-angle Stacking (1000x1200 pallet)	mm	3924
Position Deviation Accuracy	mm	±10
Communication Method	/	5G/wifi
Std. Battery Capacity	V/Ah	80/404
Weight (incl. battery)	kg	5300
Standard Dimensions (L x W x H)	mm	3640x1321x2600

Indoor-specific Omnidirectional Counterbalanced AGV

CPD10SQ-AGV1A1Li

Mainly used in indoor production lines, warehousing and other operational scenarios, especially suitable for transfer operations in narrow spaces and with long materials.

Key Features

- Dual front-wheel drive with strong power;
- Electric steering featuring high operational precision and excellent reliability;
- Three steering wheels with independent steering, enabling movement in any direction;
- Stable operational movement.

Technical Parameters

Product Model	Unit	CPD10SQ-AGV1A1Li
Type	/	Omni-Directional Counterbalance
Navigation	/	Laser Guided (Reflective)

Weight (incl. battery)	kg	2530
Standard Dimensions (L x W x H)	mm	2440x1280x2500

Indoor-specific Omnidirectional Counterbalanced AGV

CPD40-AGV1A1Li CPD50-AGV1A1Li

Indoor Counterbalanced AGV is mainly applied in the handling and stacking scenarios of heavy-load materials in warehousing and production lines.

Key Features

- Adopting laser navigation technology with a positioning accuracy of up to ±5mm;
- Compact overall vehicle with small turning radius and excellent passability;
- Full electromagnetic braking with short braking distance;360° all-round protection for high safety;
- Vertical drive and electric steering with high control precision.

Indoor-specific Counterbalanced AGV

CPD16SH-AGV6A5Li CPD20SH-AGV6A5Li
CPD25SH-AGV6A5Li CPD30SH-AGV6A5Li

It is often used in the handling and stacking scenarios of materials in indoor warehousing and production lines, suitable for working environments with relatively narrow operation space and medium and high working height conditions.

Key Features

- Adopting 3D laser SLAM navigation technology with high positioning accuracy and simpler deployment;
- Compact vehicle structure, small turning radius and high overall passability;
- Side-mounted automatic charging for higher charging reliability;
- LCD interactive intelligent instrument, facilitating users to monitor the overall vehicle status.

Indoor-specific Counterbalanced AGV

EDB15II EDB20II

Load capacity of 1.5 tons and maximum lifting height of 4.5 meters. It is suitable for various places such as logistics and warehousing systems, automated factories, workshops, warehouses, etc., and can be used for indoor handling scenarios of carriers like cross-shaped pallets and European standard pallets. It is widely applied in industries such as lithium battery, beverage, home appliance, display panel, etc.

Key Features

- High-strength frame and low center of gravity, the drive assembly meets the requirements of heavy-duty working conditions;Curtis controller + servo controller for greater stability, safety and precision;
- Reserved abundant attachment interfaces to meet the special handling scenarios of various operating conditions;
- Equipped with lifting pump control and descending proportional valve to achieve precise control of lifting and lowering;
- Standard configurations include a pallet recognition camera and a pallet positioning pressure plate, enabling precise picking and placing of multi-format pallets, racks, and material cages.

Indoor-specific Counterbalanced AGV

EDB30 EDB40 EDB50

Load capacity of 3 tons and maximum lifting height of 6 meters. It is suitable for various places such as logistics and warehousing systems, automated factories, workshops, warehouses, etc., and can be used for indoor handling scenarios of carriers like cross-shaped pallets and European standard pallets. It is widely applied in industries including lithium battery, beverage, home appliance, etc.

Key Features

- High-strength frame design ensures a low center of gravity, and the drive assembly meets the requirements of heavy-duty operations;
- Curtis controller + servo controller, delivering higher stability, safety and precision;Optional solid rubber tires, suitable for both indoor and outdoor warehouse use;
- Optional full-wheel braking for smoother operation at high lifting heights;
- Reserved abundant attachment interfaces;
- Equipped with lifting pump control and descending proportional valve to achieve precise lifting and lowering control;
- Standard configurations include a pallet recognition camera and a pallet positioning pressure plate, enabling precise picking and placing of multi-format pallets, racks, and material cages.

Outdoor-specific Counterbalanced AGV

CPD20SQ CPD25SQ CPD30SQ CPD35SQ

Suitable for transfer operations in indoor and outdoor environments of various locations including logistics and warehousing systems, automated factories, workshops, and warehouses.

Key Features

- Three-point electric steering with small turning radius and excellent passability;
- ZAPI controller delivers higher stability, safety and precision;Reserved abundant attachment interfaces;
- Equipped with lifting pump control and descending proportional valve to achieve precise lifting and lowering control;
- Dual front-wheel drive with strong power and high operating efficiency;Load capacity of 2-3.5 tons, optional.

TOWING-TYPE AGV 05

Specific Towing-type AGV EPQ30AJ

Ride-on Towing-type AGV adopts steering wheel drive with a towing capacity of 3 tons. It can hook up various types of trailers and is suitable for material transportation in warehouses and production lines, luggage transportation at airports, etc.

Key Features

- Adopting vertical drive + electromagnetic braking, featuring reliable power and fast braking response;
- Curtis controller + servo controller, ensuring higher stability, safety and precision;
- Customized modifications such as non-standard towing hooks, compatible with various types of trailers.

Technical Parameters

HIGH REACH AGV 06

Dual-mode High Reach AGV

CQDE20HJ CQDE20J

The High Reach AGV offers a substantial load capacity of 2.0 tons. Its key feature is a unique mast design that moves forward and backward as a complete unit, enabling efficient stacking in narrow aisles. This makes it perfectly suited for warehouses utilizing medium-to-high level racking in medium-density storage environments. Furthermore, it can be supplied with various custom configurations to meet diverse operational requirements.

Key Features

- Tri-point Chassis & Optional All-Wheel Braking: Ensures powerful traction and superior stability when handling loads at height.
- Curtis & Servo Controllers: Deliver enhanced operational stability, safety, and precision.
- High-Strength H-Type Mast with Ample Safety Margin: Guarantees secure and reliable high-level load handling.
- Multiple Customizable Options: Adaptable to various types of load carriers for increased versatility.

Technical Parameters

Dual-mode High Reach AGV

CQD12-AGVIC1Li CQD16-AGVIC1Li

The High Reach AGV is commonly deployed in scenarios such as narrow-aisle stacking and automatic production line docking. With a load capacity of 1.2 to 1.6 tons, its compact design and minimized turning radius enable superior performance in right-angle stacking. Furthermore, it can be supplied with various custom configurations to meet specific operational needs.

Key Features

- Equipped with an NDC control system, it ensures stable and reliable vehicle control and system scheduling.
- Adopting laser navigation, it boasts high positioning accuracy.
- Three-Point Chassis Design: Enables a compact turning radius and superior maneuverability for operation in narrow aisles and confined spaces.
- Cast Alloy Outriggers: Provide a low center of gravity and enhanced stability.
- Comprehensive Safety System: Integrates obstacle-avoidance lasers, fork-tip sensors, 3D obstacle detection, contour-following algorithms, bumpers, and audio-visual alarms for complete protection.
- NDC System with Curtis Controller: Offers a cost-effective solution, while the servo steering control ensures high-precision movement.

Cold Storage High Reach AGV

CQD16-AGV1A1LiL CQD20-AGV1A1LiL
CQD25-AGV1A1LiL CQD30-AGV1A1LiL

Cold Storage High Reach AGV is engineered for demanding environments, specifically indoor, high-bay, narrow-aisle cold storage facilities. It delivers reliable performance with the ability for continuous operation in temperatures from 0°C to -18°C and can also handle intermittent shifts in deep-freeze conditions as low as -30°C.

Key Features

- Compact Chassis Design: Optimized for high-density stacking in cold storage environments.
- Side-Mounted Wireless Charging: Ensures highly reliable and convenient charging.
- Cold-Rated Critical Components: Specialized navigation head and obstacle sensors guarantee high reliability in low temperatures.
- Cold-Specific Lubricants: Dedicated oils and greases ensure efficient and safe transmission system operation in freezing conditions.
- Corrosion-Resistant Materials: Anti-corrosion paint, chains, and cylinders built to withstand the damp, harsh cold storage atmosphere.

Specialized Omnidirectional High Reach AGV

CQD20QJ

The Omnidirectional Reach Truck features a fully moving mast that extends and retracts as a single unit. Its core capability lies in the independently controlled four-wheel steering system, which facilitates multiple movement modes, including straight travel, crabbing (lateral movement), diagonal travel, and zero-radius turning. During side-shift travel, it maintains a very narrow operating aisle. This exceptional maneuverability makes it particularly well-suited for handling long, bulky materials in confined spaces.

Key Features

- Full-Omnidirectional Movement: Capable of straight, lateral, diagonal, and zero-radius turning, with seamless, continuous switching between modes for highly efficient transport.
- Wide Chassis & Fork Carriage: Designed for handling and stacking extra-long loads with enhanced safety.
- Dual Steering-Wheel Drive/Brake System: Delivers powerful traction and reliable braking, capable of operating on wet or icy surfaces.
- Patented Reach Mechanism: Features extensive reach distance with high positioning accuracy.
- Patented Servo Steering Wheel: Ensures high-precision steering control with rapid response time.

Specialized High Reach AGV

EDQA15

The Narrow-Width High Reach AGV offers a 1.5-ton load capacity. Its key feature is a unique mast design that moves forward and backward as a complete unit. This, combined with a compact body and a minimized turning radius, results in exceptional maneuverability and operational efficiency. It is perfectly suited for stacking in narrow aisles, meeting the demands of environments with medium storage density and high throughput.

Key Features

- Slim-Profile Design & Compact Turning Radius: Enhances agility for effortless operation in narrow aisles and confined spaces;
- Imported Transmission & 3-Point Chassis: Ensures exceptional stability when the mast is extended, at any height.
- Abundant Pre-Installed Attachment Interfaces: Offers high configurability for specialized handling tasks across various scenarios.
- Precision Lift Control System: Utilizes a lift pump control and proportional lowering valve for accurate and smooth positioning.
- Standard Pallet Recognition & Handling System: Equipped with a camera and a positioning plate to enable automated handling of diverse pallets, racks, and containers.

Technical Parameters

07 TRI-DIRECTIONAL STACKING AGV

Dual-mode Tri-directional Stacking AGV

CDME16J

The Narrow Aisle Tri-directional Stacking AGV performs stacking and retrieval on both sides of the aisle through a 180-degree fork rotation and lateral shifting. A key advantage is that the vehicle does not need to turn when handling loads, resulting in simpler, safer operation and significantly enhanced efficiency. It is specifically designed for medium-to-high level stacking in narrow aisle environments.

Key Features

- Servo-driven Tri-directional Fork Head: Ensures safe, reliable, stable, and highly efficient operation.
- Premium Dual-Control System: Features imported Curtis controller and servo controller for enhanced stability, safety, and precision.
- High-Strength Imported Mast: Robust design with high safety margins guarantees stable and secure performance.
- All-Wheel Braking System: Provides exceptional stability, even during high-level lifting operations.
- Customizable Design: Can be tailored to meet specific customer requirements, including different pallet types and aisle dimensions.

Technical Parameters

Product Model	Unit	CDME16J
Type	/	Very Narrow Aisle Tri-Directional Stacker
Navigation	/	2D/3Dslam
Rated Load	kg	1600
Max. Lift Height	mm	8000
Max. Speed (Loaded/Unloaded)	km/h	5/6

HEAVY DUTY
BACKPACK AGV

08

Roller Heavy Duty Backpack AGV

BF06M0AGV

Roller Heavy Duty Backpack AGV is commonly used for material delivery in manufacturing production lines and warehousing and logistics centers.

Key Features

- Servo control for enhanced precision;
- Integrated motorized roller, compact and efficient.
- Adjustable roller speed to match various line rates.
- Multi-level positioning protection to prevent impact and slippage.
- Top-mounted control panel (HMI) for easy access.
- Zoned and prioritized task management with multi-vehicle coordination and automated charging.

Technical Parameters

COLLABORATIVE
SORTING ROBOT

1.6T COLLABORATIVE SORTING ROBOT

FJD16-AGV6A5LI

Applicable Scenarios

This system innovatively integrates the automatic handling capabilities of AGVs with automated picking functions, making it suitable for a wide range of tasks such as handling, picking, depalletizing, replenishment, loading, and unloading in both production and retail environments.

Product Features

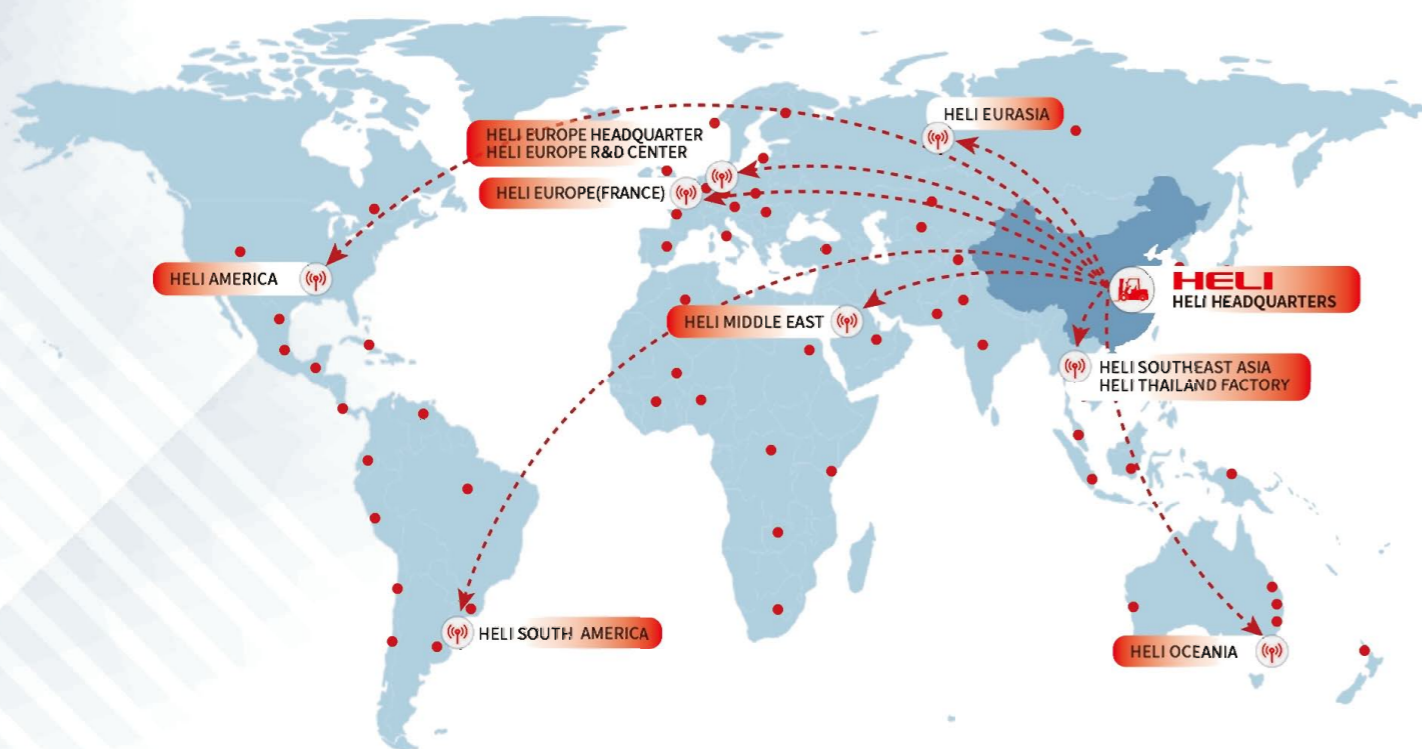

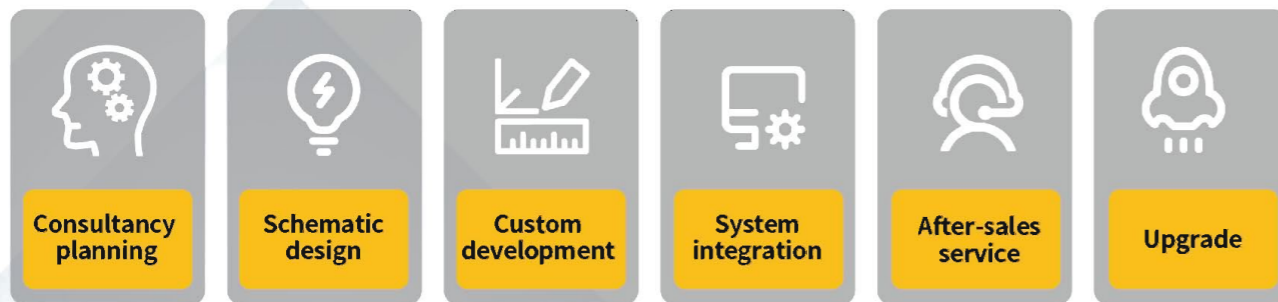

- Flexible & Efficient, Dual-Mode Synergy: The intelligent mobile robot base is equipped with flexible joints, enhancing operational efficiency in integrated scenarios such as handling and picking.
- Powerful Load & Wide Applicability: With a transport load capacity of 1600 kg, a single grasp capacity of 60 kg, and a working radius of 2000 mm.
- Precision Navigation & Stable Docking: Utilizing SLAM laser navigation technology, the vehicle achieves a positioning accuracy of ±10 mm.
- Intelligent Recognition & Accurate Operation: Automatically identifies material information and placement posture, enabling precise material selection and palletizing.
